List of Contents

NUMBER 1

John M. Mulvey and Bala Shetty	1	Financial planning via multi-stage stochastic optimization
Dong Cao and Mingyuan Chen	21	Using penalty function and Tabu search to solve cell formation problems with fixed cell cost
Giovanni Celano, Antonio Costa, Sergio Fichera and Giovanni Perrone	39	Human factor policy testing in the sequencing of manual mixed model assembly lines
Xian Liu and Wilsun Xu	61	A new filled function applied to global optimization
Peixia Gao, Sabine Wittevrongel and Herwig Bruneel	81	Discrete-time multiserver queues with geometric service times
M. Queiroz, C. Humes Jr. and J. Júdice	101	On finding global optima for the hinge fitting problem
Duncan K.H. Fong, Haizhen Fu and Zhaolin Li	123	Efficiency in shortage reduction when using a more expensive common component
A. Teeninga and A. Volgenant	139	Improved heuristics for the traveling purchaser problem
Note		
Abraham P. Punnen	151	On bottleneck assignment problems under categorization
Erratum		
Joana Dias, M. Eugénia and Joao Climaco	155	Erratum to "An interactive procedure dedicated to a bicriteria plant location model" [Computers & Operations Research 30 (2003) 1977–2002]

NUMBER 2

Ali Allahverdi	157	A new heuristic for *m*-machine flowshop scheduling problem with bicriteria of makespan and maximum tardiness
E. Mijangos	181	An implementation of Newton-like methods on non-linearly constrained networks
Oded Berman and Richard C. Larson	201	A queueing control model for retail services having back room operations and cross-trained workers
Zaid T. Balkhi and Lakdere Benkherouf	223	On an inventory model for deteriorating items with stock dependent and time-varying demand rates
Boris Goldengorin, Diptesh Ghosh and Gerard Sierksma	241	Branch and peg algorithms for the simple plant location problem
Yuri Levin and Adi Ben-Israel	257	A heuristic method for large-scale multi-facility location problems
V.C. Li, G.L. Curry and E.A. Boyd	273	Towards the real time solution of strike force assetallocation problems

L. Mikhailov 293 Group prioritization in the AHP by fuzzy preference programming method

Note

Saul I. Gass and Sasirekha Vinjamuri 303 Cycling in linear programming problems

Erratum

Adil Baykasoğlu and Nabil N. Z. Gindy 313 Erratum to "A simulated annealing algorithm for dynamic layout problem" [Computers & Operations Research 28 (2001) 1367–1460]

NUMBER 3

Volker Lauff and Frank Werner 317 On the complexity and some properties of multi-stage scheduling problems with earliness and tardiness penalties

Michel Gendreau, Gilbert Laporte and Frédéric Semet 347 Heuristics and lower bounds for the bin packing problem with conflicts

Thomas (Yew Sing) Lee 359 The effect of workers with different capabilities on customer delay

Herminia I. Calvete 383 The quickest path problem with interval lead times

Ümit Bilge, Furkan Kıraç, Müjde Kurtulan and Pelin Pekgün 397 A tabu search algorithm for parallel machine total tardiness problem

C.J. Liao and W.J. Chen 415 Scheduling under machine breakdown in a continuous process industry

Konstantin Kogan 429 Scheduling parallel machines by the dynamic newsboy problem

James V. Hansen 445 Genetic search methods in air traffic control

Belén Melián, Manuel Laguna and José A. Moreno-Pérez 461 Capacity expansion of fiber optic networks with WDM systems: problem formulation and comparative analysis

Motty Birman and Gur Mosheiov 473 A note on a due-date assignment on a two-machine flow-shop

NUMBER 4

Parag C. Pendharkar and James A. Rodger 481 An empirical study of impact of crossover operators on the performance of non-binary genetic algorithm based neural approaches for classification

Yen-Liang Chen and Hsu-Hao Yang 499 Finding the first K shortest paths in a time-window network

Enrique Ballestero and José A. Maldonado 515 Objective measurement of efficiency: applying single price model to rank hospital activities

Mayur Vamanan, Qian Wang, Rajan Batta and Robert J. Szczerba 533 Integration of COTS software products ARENA & CPLEX for an inventory/logistics problem

Bor-Ren Chuang, Liang-Yuh Ouyang and Kai-Wayne Chuang	549	A note on periodic review inventory model with controllable setup cost and lead time
Marc Reimann, Karl Doerner and Richard F. Hartl	563	D-Ants: Savings Based Ants divide and conquer the vehicle routing problem
Srikanth K. Iyer and Barkha Saxena	593	Improved genetic algorithm for the permutation flowshop scheduling problem
Alan Jessop	607	Sensitivity and robustness in selection problems
Elizabeth Jewkes, Chulung Lee and Ray Vickson	623	Product location, allocation and server home base location for an order picking line with multiple servers
Note		
Saul I. Gass and Christoph Witzgall	637	On an approximate minimax circle closest to a set of points

NUMBER 5

Gur Mosheiov and Daniel Oron	645	A note on the SPT heuristic for solving scheduling problems with generalized due dates
Mhand Hifi	657	Exact algorithms for unconstrained three-dimensional cutting problems: a comparative study
Mhand Hifi and Rym M'Hallah	675	Approximate algorithms for constrained circular cutting problems
George Kozanidis and Emanuel Melachrinoudis	695	A branch & bound algorithm for the 0-1 mixed integer knapsack problem with linear multiple choice constraints
Miroslaw Kwiesielewicz and Ewa van Uden	713	Inconsistent and contradictory judgements in pairwise comparison method in the AHP
Michel Denault and J.-L. Goffin	721	Solving variational inequalities with a quadratic cut method: a primal-dual, Jacobian-free approach
So Young Sohn and Ki Yeol Oh	745	Simulation study for the optimal repair capacity of an IT maintenance center based on LRD failure distribution
Uwe Aickelin and Kathryn A. Dowsland	761	An indirect Genetic Algorithm for a nurse-scheduling problem
Cyril Duron and Jean-Marie Proth	779	Insertion of a random bitask in a schedule: a real-time approach
Kuo-Ching Ying and Ching-Jong Liao	791	An ant colony system for permutation flow-shop sequencing
Gholam R. Amin and Mehdi Toloo	803	A polynomial-time algorithm for finding ε in DEA models
	I	Call for papers

NUMBER 6

Juan A. Carrasco	807	Solving large interval availability models using a model transformation approach

Luiz A.N. Lorena and Edson L.F. Senne	863	A column generation approach to capacitated p-median problems
Chang-Chun Lin and An-Pin Chen	877	Fuzzy discriminant analysis with outlier detection by genetic algorithm
Matthew J. Liberatore and Robert L. Nydick	889	Wash criteria and the analytic hierarchy process
E.U. Choo and W.C. Wedley	893	A common framework for deriving preference values from pairwise comparison matrices
Kun-Jen Chung and Jui-Jung Liao	909	Lot-sizing decisions under trade credit depending on the ordering quantity
Kuo-Ping Chang	929	Evaluating mutual fund performance: an application of minimum convex input requirement set approach
Edgar K. Rugenstein and Michael Kupferschmid	941	Active set strategies in an ellipsoid algorithm for nonlinear programming
Yongjian Li, Xiaoqiang Cai, Fengsheng Tu and Xiuli Shao	963	Optimization of tandem queue systems with finite buffers

NUMBER 7

Dingfei Liu and Theodor J Stewart	985	Object-oriented decision support system modelling for multicriteria decision making in natural resource management
W.L. Pearn and Y.C. Chang	1001	Optimal management of the *N*-policy $M/E_k/1$ queuing system with a removable service station: a sensitivity investigation
Kuang-Han Hsieh and Fang-Chih Tien	1017	Self-organizing feature maps for solving location–allocation problems with rectilinear distances
Jean-Yves Potvin, Patrick Soriano and Maxime Vallée	1033	Generating trading rules on the stock markets with genetic programming
An-Sing Chen and Mark T. Leung	1049	Regression neural network for error correction in foreign exchange forecasting and trading
Hsien-Chung Wu	1069	Pricing European options based on the fuzzy pattern of Black–Scholes formula
L.R. Foulds, J.M. Wilson and T. Yamaguchi	1083	Modelling and solving central cycle problems with integer programming
Toru Higuchi and Marvin D. Troutt	1097	Dynamic simulation of the supply chain for a short life cycle product—Lessons from the Tamagotchi case
Chae Y. Lee and Hee K. Cho	1115	Multiple multicast tree allocation in IP network
Yeu-Shiang Huang	1135	A structural design of decision support systems for deteriorating repairable systems
Madjid Tavana	1147	A subjective assessment of alternative mission architectures for the human exploration of Mars at NASA using multicriteria decision making

NUMBER 8

Kweku-Muata Osei-Bryson	1165	Generating consistent subjective estimates of the magnitudes of causal relationships in fuzzy cognitive maps
Jawad Abrache, Benoît Bourbeau, Teodor Gabriel Crainic and Michel Gendreau	1177	A new bidding framework for combinatorial e-auctions
Dragan Urošević, Jack Brimberg and Nenad Mladenović	1205	Variable neighborhood decomposition search for the edge weighted *k*-cardinality tree problem
Luca Bertazzi, Giuseppe Paletta and M. Grazia Speranza	1215	An improved heuristic for the period traveling salesman problem
M. Helena Correia, José F. Oliveira and J. Soeiro Ferreira	1223	Reel and sheet cutting at a paper mill
Wonjoon Choi and Robert H. Storer	1245	Heuristic algorithms for a turbine-blade-balancing problem
Yi-Chih Hsieh and Ta-Cheng Chen	1259	Reliability lower bounds for two-dimensional consecutive-*k*-out-of-*n*: F systems
Bibo Yang, Joseph Geunes and William J. O'Brien	1273	A heuristic approach for minimizing weighted tardiness and overtime costs in single resource scheduling
Dvir Shabtay	1303	Single and two-resource allocation algorithms for minimizing the maximal lateness in a single machine
Nashat Mansour, Hiba Tabbara and Tarek Dana	1317	A genetic algorithm approach for regrouping service sites
James Flynn and Chia-Shin Chung	1335	A heuristic algorithm for determining replacement policies in consecutive *k*-out-of-*n* systems
Ching-Fang Liaw	1349	Scheduling two-machine preemptive open shops to minimize total completion time

NUMBER 9

Herbert F. Lewis and Thomas R. Sexton	1365	Network DEA: efficiency analysis of organizations with complex internal structure
Yi Liao, Shu-Cherng Fang and Henry L.W. Nuttle	1411	A neural network model with bounded-weights for pattern classification
Morten Riis and Kim Allan Andersen	1427	Multiperiod capacity expansion of a telecommunications connection with uncertain demand
Francisco Aparisi and J. García-Díaz	1437	Optimization of univariate and multivariate exponentially weighted moving-average control charts using genetic algorithms
Attahiru Sule Alfa and K.P. Sapna Isotupa	1455	An $M/PH/k$ retrial queue with finite number of sources
Elliot Bendoly	1465	Integrated inventory pooling for firms servicing both on-line and store demand

Moshe Kaspi and Dvir Shabtay	1481	Convex resource allocation for minimizing the makespan in a single machine with job release dates
Rafael Martí and Abdellah El-Fallahi	1491	Multilayer neural networks: an experimental evaluation of on-line training methods
Orhan Karasakal and Esra K. Karasakal	1515	A maximal covering location model in the presence of partial coverage
So Young Sohn and Seung Hwan Lee	1527	Sensitivity analysis for output performance measures in long-range dependent queueing system
I. Atencia and P. Moreno	1537	The discrete-time *Geo*/*Geo*/1 queue with negative customers and disasters
Asad Tavakoli and Constance Lightner	1549	Implementing a mathematical model for locating EMS vehicles in fayetteville, NC

NUMBER 10

Klaus Jansen and Monaldo Mastrolilli	1565	Approximation schemes for parallel machine scheduling problems with controllable processing times
Malachy Carey and Mark McCartney	1583	An exit-flow model used in dynamic traffic assignment
Chih-Ping Chiang and Shine-Der Lee	1603	Joint determination of machine cells and linear intercell layout
Jinchang Wang and Thomas Kaempke	1621	Shortest route computation in distributed systems
Önder Tombuş and Taner Bilgiç	1635	A column generation approach to the coalition formation problem in multi-agent systems
Chien-Hung Lin and Ching-Jong Liao	1655	Makespan minimization subject to flowtime optimality on identical parallel machines
R. Montemanni and L.M. Gambardella	1667	An exact algorithm for the robust shortest path problem with interval data
Lev V. Utkin	1681	Reliability models of *m*-out-of-*n* systems under incomplete information
M.M. Ali and A. Törn	1703	Population set-based global optimization algorithms: some modifications and numerical studies
Ghaith Rabadi, Mansooreh Mollaghasemi and Georgios C. Anagnostopoulos	1727	A branch-and-bound algorithm for the early/tardy machine scheduling problem with a common due-date and sequence-dependent setup time
Thomas J. Candalino jr., John E. Kobza and Sheldon H. Jacobson	1753	Designing optimal aviation baggage screening strategies using simulated annealing

NUMBER 11

Steven Chamberland	1769	An efficient heuristic for the expansion problem of cellular wireless networks
K. Das, T.K. Roy and M. Maiti	1793	Multi-item stochastic and fuzzy-stochastic inventory models under two restrictions

Yeh Lam and Yuan Lin Zhang	1807	A shock model for the maintenance problem of a repairable system
R. Caballero and M. Hernández	1821	The controlled estimation method in the multiobjective linear fractional problem
Ossama Kettani, Belaïd Aouni and Jean-Marc Martel	1833	The double role of the weight factor in the goal programming model
Oded Berman and Michal Cutler	1847	Resource allocation during tests for optimally reliable software
Amir H. Abdekhodaee, Andrew Wirth and Heng Soon Gan	1867	Equal processing and equal setup time cases of scheduling parallel machines with a single server
Józef Grabowski and Mieczyslaw Wodecki	1891	A very fast tabu search algorithm for the permutation flow shop problem with makespan criterion
Anthony C. Keys and Loren Paul Rees	1911	A sequential-design metamodeling strategy for simulation optimization
Kweku-Muata Osei-Bryson	1933	Evaluation of decision trees: a multi-criteria approach

NUMBER 12

S.C. Ho and D. Haugland	1947	A tabu search heuristic for the vehicle routing problem with time windows and split deliveries
Tsan-Ming Choi, Duan Li and Houmin Yan	1965	Optimal single ordering policy with multiple delivery modes and Bayesian information updates
Christian Prins	1985	A simple and effective evolutionary algorithm for the vehicle routing problem
Huan-Neng Chiu, Jen-Huei Chang and Chia-Hsin Lee	2003	Lot streaming models with a limited number of capacitated transporters in multistage batch production systems
Chih-Hsiung Wang	2021	The impact of a free-repair warranty policy on EMQ model for imperfect production systems
Jean Berger and Mohamed Barkaoui	2037	A parallel hybrid genetic algorithm for the vehicle routing problem with time windows
Hark-Chin Hwang, Soo Y. Chang and Kangbok Lee	2055	Parallel machine scheduling under a grade of service provision
Masao Yokoyama	2063	Scheduling for two-stage production system with setup and assembly operations
Hung-Chi Chang	2079	An application of fuzzy sets theory to the EOQ model with imperfect quality items
Huang Wenqi and Yin Aihua	2093	An improved shifting bottleneck procedure for the job shop scheduling problem

Note

Parthasarati Dileepan	2111	A note on minimizing maximum lateness in a two-machine no-wait flowshop
	2117	Call for Papers

NUMBER 13

M.L. Chaudhry and Jin D. Kim	2119	Complete analytic and computational analyses of the discrete-time bulk-arrival infinite-server system: $GI^X/Geom/\infty$
M.L. Chaudhry, U.C. Gupta and V. Goswami	2137	On discrete-time multiserver queues with finite buffer: GI/Geom/m/N
M. Solimanpur, P. Vrat and R. Shankar	2151	A neuro-tabu search heuristic for the flow shop scheduling problem
Xinjian Lu and Franklin Lowenthal	2165	Arranging fact table records in a data warehouse to improve query performance
Antonio Sedeño-Noda, Carlos González-Martín and Sergio Alonso	2183	A generalization of the scaling max-flow algorithm
Dae Sung Lee, Vassilios S. Vassiliadis and Jong Moon Park	2199	A novel threshold accepting meta-heuristic for the job-shop scheduling problem
G. Alexouda	2215	An evolutionary algorithm approach to the share of choices problem in the product line design
Gang Uk Hwang and Bong Dae Choi	2231	Performance analysis of the DAR(1)/D/c priority queue under partial buffer sharing policy
Ş. İlker Birbil, Shu-Cherng Fang and Jiye Han	2249	An entropic regularization approach for mathematical programs with equilibrium constraints
Roberto Wolfler Calvo, Fabio de Luigi, Palle Haastrup and Vittorio Maniezzo	2263	A distributed geographic information system for the daily car pooling problem
Dvir Shabtay and Moshe Kaspi	2279	Minimizing the total weighted flow time in a single machine with controllable processing times
	2291	Call for Papers

NUMBER 14

Theodor J. Stewart, Ron Janssen and Marjan van Herwijnen	2293	A genetic algorithm approach to multiobjective land use planning
José Carlos Becceneri, Horacio Hideki Yanasse and Nei Yoshihiro Soma	2315	A method for solving the minimization of the maximum number of open stacks problem within a cutting process
Stephen D. Patek	2333	Policy iteration type algorithms for recurrent state Markov decision processes
Chae Y. Lee, Young P. Moon and Young Joo Cho	2349	A lexicographically fair allocation of discrete bandwidth for multirate multicast traffics
Attahiru Sule Alfa	2365	Markov chain representations of discrete distributions applied to queueing models
M. Caramia, G. Felici and A. Pezzoli	2387	Improving search results with data mining in a thematic search engine

Chan-Kyoo Park, Sangwook Lee and Soondal Park	2405	A label-setting algorithm for finding a quickest path
Suryani Chao, John W. Chinneck and Rafik A. Goubran	2419	Assigning service requests in Voice-over-Internet gateway multiprocessors
Nader Azizi and Saeed Zolfaghari	2439	Adaptive temperature control for simulated annealing: a comparative study
Hsiao-Fan Wang and Kuang-Yao Wu	2453	Hybrid genetic algorithm for optimization problems with permutation property
	I	Volume 31 Contents and Author Index
